innovation + style

PLUS FINGER PADS

High friction material and gripping textures make turning pages easy.

Finger Pad Cap Style

GREEN and BLUE

■ Gripping from any angle

The cap style finger pads cover the entire tip of your finger, providing superior gripping strength at any angle. Flip through pages quickly with the cap style finger pad optimizing the most amount of fingertip surface area. Easy to put on by just pulling the flap.

■ Honeycomb texture

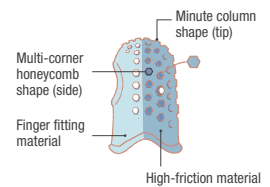

The hexagonal honeycomb bumps have many corners which grab the paper. Pages can be turned over with ease thanks to the new high-friction material.

■ Great for long working hours

Ventilation holes at the rear of the finger and the front center, combined with inner bumps keep the finger pad from sticking to your finger and minimizes sweat. The inner cushion provides both firmness and comfort for long working hours. The new material doesn't have the unpleasant rubber smell associated with other finger pads.

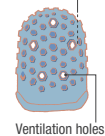

Pull the flap to secure.

Minute column shape (tip)
Multi-corner honeycomb shape (side)
Finger fitting material
High-friction material

Inside: Soft-touch bumps to keep your finger from sticking to the material while minimizing sweat.

Ventilation holes

Finger Pad Ring Style

GREEN and BLUE and PINK and YELLOW

■ Great for long working hours

The ring style finger pads give your fingers exceptional breathability. The soft material stretches comfortably without pinching. You can even do other work with the finger pads still on. The silicon material doesn't have any rubber odor.

■ Easy page flipping

High friction material and raised ridges provide great gripping power.
